DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-31, drawn to a water heater and temperature sensor usable therewith, classified in class 392, subclass 449.
- II. Claims 32-35, drawn to a method of sensing temperature, classified in class 392, subclass 441.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the temperature sensor and water heater can be used together in a method of sensing temperature that does not require the determination of a tank thermal profile.

A telephone call was made to Sheldon Wolfe on 7/24/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
